AI on Azure

What is AI?

AI is the capability of a machine to imitate intelligent human behavior. Through AI, machines can analyze images, comprehend speech, interact in natural ways and make predictions using data

Microsoft first to achieve human parity in:

Vision

Object recognition

Speech

Speech recognition

Language

Machine translation

Azure AI

*World-class research in vision, speech, language processing,
and custom machine learning.*

Azure AI helps organizations:

Machine Learning Models

Incorporate vision

Knowledge-mining solutions

Example of AI:

Rinna

Remaja Artifisial

#Rinna

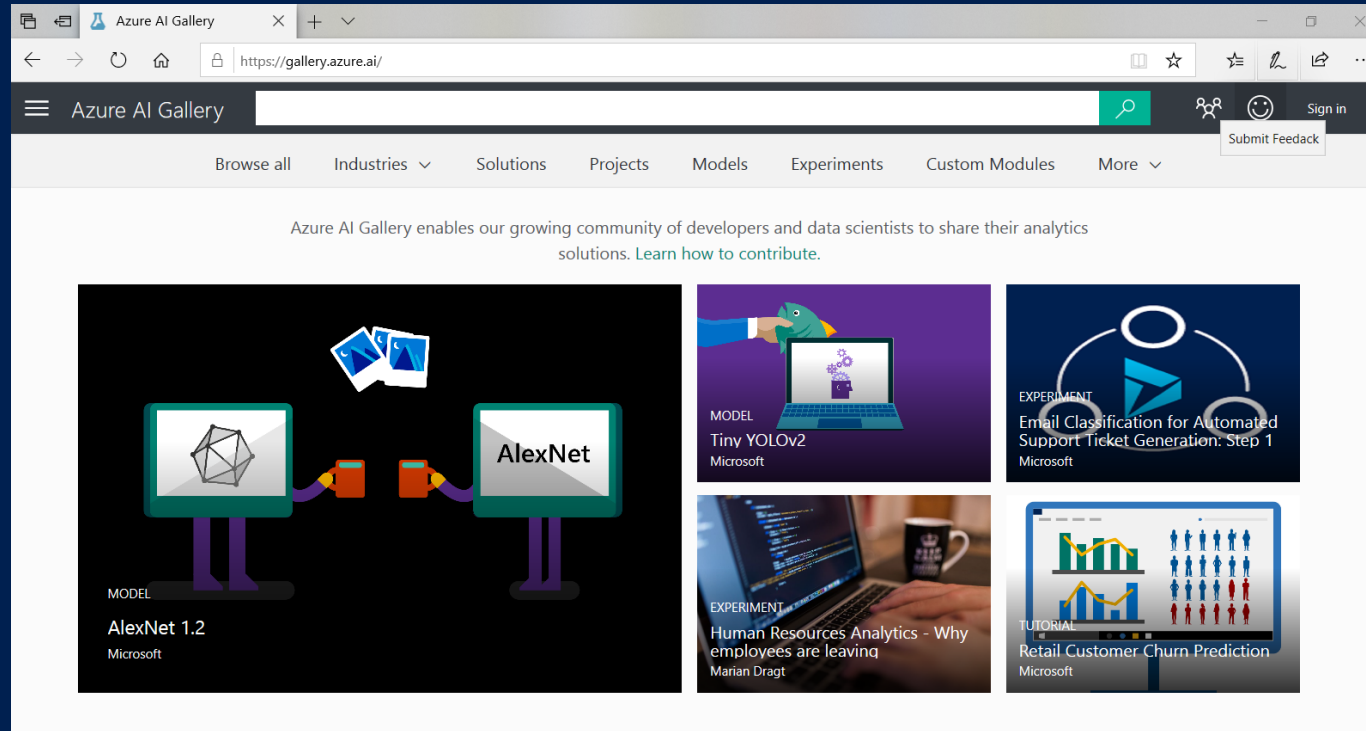

Azure AI

Analyze content in images
